PURPOSE OF A TARIFF

Tariffs are defined in the Act as:

"A schedule of fares, rates, charges and terms and conditions of carriage applicable to the provision of an air service and other incidental services".

Tariffs should be considered as the basic terms and conditions under which the carrier operates its business. Although most carriers will have similar tariffs, each carrier should ensure that its tariff is applicable to and meets the needs of its own operation.

The purpose of a tariff is to protect both the carrier and the consumer against unexpected demands or conditions imposed upon it by the other party due to misunderstanding or deceit.

SAMPLE TARIFF

The attached tariff is intended as a **sample only** and applies to domestic services only. Each carrier should carefully analyze its own operation and create a tariff that is applicable to its own type of business.

Every tariff should include a tariff number, title page, index, definitions, issue date, effective date, name of issuing party, consecutive page numbers, and the carrier's policy in respect of matters identified in subparagraph 107(1)(n) of the *Air Transportation Regulations*.

The tariff may be edited as often as necessary; however, new pages should be given the same number as the original and should indicate that the page is an amendment to the original page number. Amended pages must be retained for a period of not less than three years.
